## 1 Libraries

This program uses the slick util library and lwjgl. To install the slick util library, go to the following website.

<http://slick.ninjacave.com/slick-util/>

<http://www.lwjgl.org/download>

<http://www.lwjgl.org/download> Drag the jar file into the Library/java/Extensions folder on mac.

## 2 Running from terminal

Navigate to the src folder in terminal using the "cd" command, and then dragging in the src folder.

```
cd /Users/Stuart/Desktop/3d/src
```

Compile the code.

```
javac *.java
```

And then run the program (WalkAround.java is the main class)

```
java WalkAround
```

Have fun playing the game
